

**COURSE TITLE:**

**“FACIAL INJECTABLES IN THE DENTAL PRACTICE – IS IT TIME TO GET TRAINED?”**

**PROGRAM FORMAT:**

**7-HOUR DIDACTIC PROGRAM**

**TARGET AUDIENCE:**

**Clinicians considering getting trained in facial injectable procedures such as Botox and dermal fillers.**

**COURSE DESCRIPTION:**

**Before committing time and financial resources to a treatment modality such as facial injectables, it’s important to know if these procedures suit your practice, your skills and especially your interests. But even dentists who don’t plan on offering facial injectables in their practice, at a minimum, should understand how they’re used therapeutically. This program offers an overview of current FDA approved facial injectables, and how they integrate with dental practice. Treatment of TMJ disorders and parafunctional habits will be discussed in detail. Practice management essentials such as staffing, equipment, insurance requirements, as well as costs and overhead are also presented.**

**LEARNING OBJECTIVES:**

**At the conclusion of the program, participants will be better able to:**

- Discuss indications for Botox, dermal fillers and deoxycholic acid**
- Describe how injectable products are used to improve signs of facial aging**
- Discuss the business implications and requirements for successful implementation**
- Explain how toxins can be used to manage TMJ and parafunction**

**RECOMMENDED PACE/CERP SUBJECT CODES:**

<b>780 Esthetics/Cosmetic Dentistry</b>	<b>3 CE</b>
<b>010 Basic Science</b>	<b>2 CE</b>
<b>200 Orofacial Pain</b>	<b>2 CE</b>
